

Diamond Drill

Out of the Past

January 32, 1949

It was a happy day when Mrs. Veronica Grattan and her family occupied their new home on the corner of South Fifth Street and Forest Avenue. Constructed almost entirely by the Grattan boys, Leonard and Raymond, the bungalow type structure is modern in every detail. With the exception of masonry, plumbing and electrical the home became a reality through the efforts of the two sons and a group of energetic friends, Cal Bauer, John Carlotto, John DeAmicis and Frank Simeoni to mention a few who devoted long after work hours for completion of the residence. On the subject of new homes, the Santo Albarello's have recently moved into their new residence on the corner of Crystal Avenue and Park Street constructed by a crew under the direction of Alvin Johnson. The family, which includes three children, Lena, Celia and Tony, all living at home, formerly resided at the Carpenter Location.

Did you know that the elevation at the Iron County Courthouse at the top of Superior Avenue is 1,517.38 feet above sea level as compared to 1,322 feet at the bottom of Superior Avenue? Iron County contains 759,551 acres of land.
