

Diamond Drill

Out of the Past

August 9, 1951

The Proksch Construction Company of Iron River has a crew of some 20 men at work on the buildings for the Inland Steel's new Cayia Mine located a mile east of Crystal Falls on Hwy M-69. The firm is erecting three buildings on the north side of the highway, one a combination machine shop, dry and office structure plus an engine house and a garage. Proksch is also erecting concrete foundations for the skip and cage hoists, compressors and other large machinery units. The underground ore body itself is located on the south side of M-69.

Three Crystal Falls youths won a trip to East Lansing with top achievement awards at the Upper Peninsula District 4-H Club Show at Camp Shaw in Chatham. Marv Kaski (17) and Max Woelffer (14) will represent the Dairy Judging Team while Miss Marlene Ekola will give her dish washing demonstration. The group will compete at the 4-H Club Show at Michigan State College at the end of August.
