

Diamond Drill

Out of the Past

August 28, 1974

Edward Brauer, who last year opened the Cedar Inn Motel located at the South City Limits of Crystal Falls, is contemplating an extensive expansion of the facility. Preliminary plans call for an elaborate two story addition featuring a cocktail lounge and supper club on one level and large banquet and meeting area on the other level. The project is contingent upon the City extension of the sewer system to the site.

The Crystal Falls City Commission has heard public concerns about the proliferation of emergency vehicle hardware used on private vehicles operated by members of the volunteer fire department. The council had no quarrel with the principle of their actions but had misgivings about what some in the public felt was excessive zeal of getting to a fire. Exceeding speed limits and ignoring normal traffic regulations in the congested city area with pedestrian and normal vehicle movements when responding to a fire is actually resulting in safety hazards. Members of the council agreed that emergency vehicles should not create a new public problem to combat another.
