

Diamond Drill

Out of the Past

January 23, 1974

A meeting between the Iron County Airport Commission, Stambaugh City Commission and Nova Land Company regarding the future of the Stambaugh Airport resulted in no definite decision. Nova Land Company of Crystal Falls became half owner of the property on which the airport sits along with the City of Stambaugh when the company secured parcels of land primarily in the Crystal Falls area with purchase transactions from the Stegmiller Estate. In the past Stambaugh has entered into a lease agreement for the half of airport property they did not own. Mike Casanova, representing Nova Land Company, stated that the company is not interested in seeing the airport closed and hoped a new lease agreement with County could be secured.

The Forest Park Schools will purchase a video tape system that will have varied school uses. The purchase has been under consideration for some time but use only by the athletic department did not justify the purchase. With the development of an audio-visual department, under the direction of school librarian Jerome Waldron, a wide variety of uses will become available both for athletics but also educational and entertainment endeavors.
