

Diamond Drill

Out of the Past

December 1, 1949

An optometry practice was added to the Crystal Falls professional family this week when Dr. James W. Hammel, native of Iron Mountain, opened his offices in the Crystal Inn (400 Superior). Dr. Hammel is believed to be the first resident optometrist in the history of Crystal Falls with only visiting eye specialists attending to the needs of the community in the past. A modern office suite has been furnished in room 223 & 224 on the second floor of the hotel building.

Completely re-designed and re-engineered International trucks and refrigerators will be on display at the M. Malkin & Sons implement building (11 Superior). The new International truck line consists of 87 chassis models designed to handle any type of hauling job. Two new valve-in-head six cylinder diamond series engines are available featuring a 220 cubic inch displacement producing 100 horsepower and a 240 cubic inch producing 108 horsepower. In keeping with the modern trend in home furnishings the newly redesigned compact refrigerators are streamlined and tailored with smooth surfaces not broken by any grills, louvers, emblems etc. making for easy cleaning.
