

Diamond Drill

Out of the Past

April 25, 1924

Crystal Falls Postmaster James R. Flood has secured authority for the carrying of mail on a new rural route to extend east of the City to the county line west of Sagola. The route starts at the Fairbanks and Great Western Locations past the Hilltop mine joining the road north of Runkle Lake proceeding to the Armenia Location, thence to Mansfield where it branches off up to the old location and east to Mansfield School #2 then to the County line and on its return west serving the Hope Mine area before returning to Crystal Falls.

A number of Alpha residents are having their "worthless" dogs shot rather than pay the license fee forced upon them. Five dogs were dispatched last week by area citizens.

Local authorities have been cracking down on establishments that illegally sell cigarettes to underage persons. The State laws are very plain in prohibiting the sale of cigarettes to children of school age.

Notice: All users of water from the Crystal Falls water works should be boiled before used for drinking purposes until further notice. Dr. C.F. Larson – Health Officer.
