

Diamond Drill

Out of the Past

October 26, 1923

The J.W. Wells Lumber Co. has launched one of the biggest construction projects of its type in Stambaugh Township. Located on a small elevated plateau on the north end of Hagerman Lake the project consists of an entire new set of permanent camps sufficient in size for the next 10 to 20 years of logging operations in the vicinity by the company. Included is a logging railroad, machine shops, round house which will cover 10 acres of recently cleared hardwood forest.

At the recent club meeting Rotarians were treated to one of the finest meals in the history of the Club. The duck dinner was made possible by the accurate shooting of G.E. Harrison, Dr. A.J. Hockings and Dr. Robert Hockings on a recent hunt in Minnesota.

Alpha and Pentoga people are requesting having the road changed around Indian Lake. The present road has a sharp corner to the south then a sharp corner to the west to continue on to the Chicagon Lake Road. It is proposed that the road be moved to be diagonal past Indian Lake thus eliminating dangerous and twisting current route.
