

Diamond Drill

Out of the Past

September 29, 1949

A contract with the Federal Government will result in the offering to rural students of the Crystal Falls Schools full hot meals. The district will be changing the hot lunch program to a complete meal. The School Board has authorized the appropriation for the program from \$325 to \$900 used to meet the increased operational cost and to purchase necessary additional equipment.

A new "Liquid Universal Hydro" bottle washer has been installed in the Crystal Falls Pop factory (116 Superior). Owners Joel Anderson along with sons Bill and Paul report the new equipment can wash 60 cases of pop bottles per hour. The Anderson Family has been in the pop business since 1923 and began construction of their new building on Superior Avenue in 1947.

Total enrollment in the Crystal Falls School District this year totals 811 students. Children from Crystal Falls City and Township plus Mansfield Township contributing 44 pupils are included with the High School (213), Junior High (116) and grades K-sixth (482).
