Diamond Drill

Out of the Past

October 29, 1898

The Stenographic Institute of Ann Arbor is willing to give two or three deserving young people a complete course in shorthand and typewriting in payment for services as janitor and light work during the present fall and winter sessions.

The Great Western Mine located in the Northeast corner of Crystal Falls is beginning the process of resuming operations. A crew of men from the McKinney Steel Company has been put to work getting the boilers started which have not been heated since February 1893 and will begin the pumping process. One of the top producing mines in the area was opened in 1882 and has shipped over 370,000 tons of ore to date with 87,000 tons being shipped in 1892 alone.
