

Diamond Drill

Out of the Past

August 27, 1898

The apple crop in the vicinity this year is remarkable. The trees are so heavily loaded that props have to be placed under the limbs to keep them from breaking.

The Crystal Falls School census finds that there are 741 children of school age as compared to 700 from last year. Attention is brought to the State of Michigan Law which compels children between the ages of eight and fourteen to attend school five months of the year beginning in September. The penalty for disobeying the law is imprisonment both for the child and the parent.

With the beginning of operations for the new Crystal Falls Hoop Company a series of employee injuries are being reported. W.H. Marsh had a part of his thumb and forefinger cut off and George Desbien had three fingers of his right hand badly cut.
