

Diamond Drill

Out of the Past

July 32, 1960

Robert Nylund, who joined the Diamond Drill mechanical staff in 1944 as an apprentice shortly after graduating from Crystal Falls High School in 1943 has accepted a new position with Iron Mountain News. He will continue as a linotype operator which is one of the most complicated machines in the printing trade industry. Over the past 16 years Nylund has worked for short periods at Monroe, Albion and Gladstone. Married to the former Sally Nyland, the couple has four children, Bobbie Lee, Larry, Debra and Sally Jo and will continue to make their home in the Western Location.

The per capita costs of county government in Iron County are almost double that of neighboring Dickinson County according to the Michigan Auditor's report. Iron County's costs are \$67.97 per person while Dickinson County's cost was only \$34.48 per person. The figures are calculated by dividing total government costs by population with Dickinson County population (24,844) vs. Iron County's population (17,692). Members of the Iron County Board of Supervisors have branded the report "misleading".
