Diamond Drill

Out of the Past

October 20, 1976

The Forest Park High School Class of 1977 will be billed for damages to the Crystal Falls City water tank. The Crystal Falls City Council approved a bill in the amount of $500 to the senior class to cover the cost of repainting the tank. A water tank/standpipe in various forms has been located behind the Iron County Courthouse since the early 1900's. Through the years numerous Crystal Falls School Classes have defaced the metal structure by painting their class year and other inappropriate messages often overpainting the previous graffiti.

John Plowe is developing the 40 acre plot he purchased into a future residential subdivision lots. The property in Crystal Falls Township is located just west of the "school woods" is bounded on the east by Ski Hill Road, Forest Parkway on the north and almost to Forest Avenue on the south. Four lots have already been sold and an access road has been cut through the heavily wooded property.

JOHN PLOWE has purchased the approximately 40 acres of land bordering Ski Hill Road, just west of the "school woods," and is platting it out for lots, four of which have already been sold. Two 'rights of way' heading north and south have been cut through the heavily wooded stand by Jim Phillips, and initial building will probably commence next summer. Plowe had extensive plans for the property that have been modified somewhat because of sewer limitations in the city.
